CAREER OBJECTIVE

Highly motivated and tech-savvy professional with a strong passion for **Advanced Excel, Power Query automation, and Python application development**. I believe in working smart and creating efficient, automated solutions to simplify complex tasks. Eager to join a dynamic organization where I can **utilize and expand my skills in data automation, analytics, and AI tools**, contribute to process optimization, and continuously learn innovative technologies to drive smarter business outcomes.

EDUCATIONAL QUALIFICATION

BCOM	IGNOU	2022-2026
Senior Secondary	Agrasen Inter College Dadri	2021-2022
Secondary	SHVM Public School	2019-2020

TECHNICAL & IT SKILLS

➤ Python Skills:

- **Python Fundamentals:**
 - Proficient in basic syntax, data types, and control structures
 - Experienced in functions, modules, and exception handling
- **Data Analysis:**
 - Skilled in data manipulation with pandas (cleaning, transformation, merging)
 - Experienced in data visualization using Matplotlib, Seaborn, and Plotly
- **Libraries & Tools:**
 - Proficient in libraries such as pandas, NumPy, Matplotlib, Seaborn, Plotly
 - Experienced with IDEs like PyCharm, Jupyter Notebook, VS Code
- **Project Development:**
 - Developed Python-based automation projects, including an **NSC Move-In Dashboard** (Flask) for visualizing SAP data and an **AI PDF Rename Application** using OCR for automating file management.

➤ **SAP Experience:**

- Hands-on experience with SAP for data entry and report handling.
- Skilled in generating and analyzing reports for daily operations.
- Maintained data accuracy while working with large datasets.
- Supported process efficiency through effective SAP usage.

➤ **Excel Proficiency:**

- Advanced Excel functions and formulas (VLOOKUP, INDEX, MATCH, etc.)
- Pivot tables and pivot charts
- Conditional formatting
- Data validation

➤ **Data Analysis:**

- Data cleaning and transformation
- Data visualization and dashboard creation

➤ **Power Query:**

- Data extraction from various sources
- Data transformation and loading
- Internal Formulas

➤ **AI Tools:**

- Utilizing AI tools for data insights and automation
- Prompt engineering for AI applications (ChatGPT & Deepseek)
- AI tool for debugging error while programming

➤ **Web Technologies:**

- HTML and CSS for web development
- Basic web design principles

➤ **Software & Tools:**

- Microsoft Office Suite
- Google Sheets

➤ **Adobe Photoshop:**

- Designing elements for Excel dashboards
- Creating graphics for web applications
- Creating Icons for GUI applications

➤ **Architecture & 3D Modeling:**

- Basic architecture principles
- 3D modeling in SketchUp

SOFT SKILLS

- Strong analytical and problem-solving skills
- Quick learner
- Excellent communication and teamwork abilities
- Strong Dedication
- Self-Learner: Independently acquire new skills and knowledge through self-directed study and practical experience.

ACHEIVEMENTS & OTHERS

➤ Developed Applications:

- **Project 1: NSC Move-In Dashboard**
Developed a **Python and Flask-based web application** that visualizes **Move-In data** from SAP-exported Excel files. The application allows users to upload raw data and automatically generates interactive dashboards with key insights, improving data visibility, accuracy, and decision-making efficiency within the NSC department.
- **Project 2: AI PDF Rename Application:** Developed an intelligent Python-based automation tool during my tenure at NPCL Data Center to streamline the manual PDF renaming process used in sealing certificate management. Previously, after the sealing certificate and meter data were entered into SAP, the team manually opened each scanned PDF and identified handwritten BP Numbers (10-digit numbers starting with 200) to rename the files — a time-consuming and error-prone process.
The developed AI PDF Rename Application automated this entire workflow using EasyOCR's free API to read and extract handwritten BP Numbers directly from scanned PDFs, and automatically renamed the files accordingly. This innovation eliminated repetitive manual work, improved accuracy, and saved significant time in daily operations at the data center.

➤ Automated Reports & Dashboards:

- Developed **8–10 automated reporting solutions** using Excel Power Query at NPCL.
- Designed systems to **load, clean, and transform data automatically**, enabling report generation with a single refresh.
- Reduced manual effort significantly by ensuring that **reports are generated instantly upon opening the file**.
- Improved team productivity by **eliminating repetitive tasks and minimizing human errors** through automation.

➤ Awards

- Received the Star Card Award twice in the NPCL control room for good quality work.

➤ **Developed Applications:**

○ **Project 1: NSC Move-In Dashboard**

Developed a **Python and Flask-based web application** that visualizes **Move-In data** from SAP-exported Excel files. The application allows users to upload raw data and automatically generates interactive dashboards with key insights, improving data visibility, accuracy, and decision-making efficiency within the NSC department.

- **Project 2: AI PDF Rename Application:** Developed an intelligent Python-based automation tool during my tenure at NPCL Data Center to streamline the manual PDF renaming process used in sealing certificate management. Previously, after the sealing certificate and meter data were entered into SAP, the team manually opened each scanned PDF and identified handwritten BP Numbers (10-digit numbers starting with 200) to rename the files — a time-consuming and error-prone process.

The developed AI PDF Rename Application automated this entire workflow using EasyOCR's free API to read and extract handwritten BP Numbers directly from scanned PDFs, and automatically renamed the files accordingly. This innovation eliminated repetitive manual work, improved accuracy, and saved significant time in daily operations at the data center.

➤ **Automated Reports & Dashboards:**

- Developed **8–10 automated reporting solutions** using Excel Power Query at NPCL.
- Designed systems to **load, clean, and transform data automatically**, enabling report generation with a single refresh.
- Reduced manual effort significantly by ensuring that **reports are generated instantly upon opening the file**.
- Improved team productivity by **eliminating repetitive tasks and minimizing human errors** through automation.

➤ **Awards**

- Received the Star Card Award twice in the NPCL control room for good quality work.

Professional Experience

Data Entry Operator | Control Room | Noida Power Company Limited

January-2023 To May-2024

MIS Executive | Plus 360 Fahrenheit Solutions Pvt Limited

May-2024 To July-2024

Data Entry Operator | Metering Data Center | Noida Power Company Limited

December-2024 To Present

PERSONAL DETAILS

- Father's name : Mr. Dinesh Kumar
- Date of birth : 11/Nov/2004
- Languages : Hindi, English
- Hobbies : Programming, Exploring AI and IT innovations, and developing quick, smart, and automated solutions.
